

Making your very own tree kangaroo mask

Step 1

Print out the next page onto stiff card.

Step 2

Cut out the head and the snorkel.

Step 3

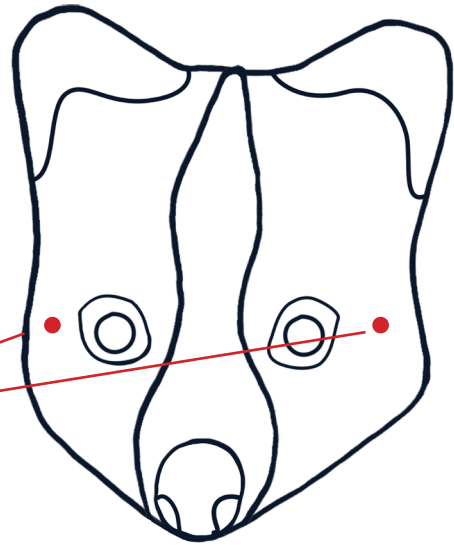

Colour in as you wish.

Step 3

Cut out some small holes where the eyes are.

Step 4

Make two holes halfway between the eyes and the edge of the fur (where the red dots are) and tie some elastic between them.

Step 5 (optional)

If you like, cut carefully around the nose starting a little below the eyes (see the red line). This will make the nose stick out a little bit and give the mask a bit more depth.

Have fun!
