

Making your very own Widodo mask

Step 1

Print out the next two pages onto stiff card.

Step 2

Cut out the head just inside the edge of the fur.

Step 3

Cut out the snorkel.

Step 4

Cut out some small holes where the eyes are.

Step 5

Make two hole halfway between the eyes and the edge of the fur (where the red dots are) and tie some elastic between them.

Step 6 (optional)

If you like, cut carefully around the nose starting a little below the eyes (see the red line).

This will make the nose stick out a little bit and give the mask a bit more depth.

Step 7

Now all you have to do is decide which way you want the snorkel to face. Once you have, stick it in position over the rest of the mask.

Have fun!

Love, Widodo
